Artist Statement

The structure form and beauty of the human body have always intrigued and mystified me. The human form appears to me as a stage to play out complex emotions, ideas and feelings.

I intend to develop a body of work consisting of a single female figure model. The topic will be emotions such as despair, sadness, depression, shame, embarrassment, calm, relaxation, impatience, contemplation, love and anger, as shown by gestures, position expressions and color overtones. I will focus on human forms, shapes and details. I will include an object common to all of the images, which will provide a common thread, and pose the question of its significance and meaning.
